Colleges Scotland comments on exam results 2014

A spokesperson for Colleges Scotland said: "Pupils across Scotland have done really well and we congratulate them on their results. Many will be thinking about their next option for study, whether it's staying at school, finding work or progressing to college or university.

"Colleges across Scotland offer a wide range of courses across both traditional and emerging industries such as renewable energy, engineering, life sciences, health and care, and creative industries, from entry level up to degree qualifications.

"College places are in great demand and we urge pupils to get in touch with staff at their local colleges and find out what opportunities are available to them."
